Summary

I am a department manager with experience leading large-scale projects as a Product Owner. I possess strong full-stack development skills in JavaScript, including modern tools and frameworks. I enjoy working on complex and creative projects, implementing innovative solutions, and delivering high-quality products. I adapt easily to new tasks and strive for maximum efficiency both in team management and development. Always eager to learn and ready to leverage my expertise to achieve company goals and bring exciting projects to life.

Project experience

MedAccount, [Link](#) [Next JS, Reack Native, Webpack]

Team Project / Role: Product Owner

As a Product Owner, I led the development of MedAccount, the first professional social network for doctors in Ukraine. The platform provides multifunctional tools, including online conferences, hybrid events in teleconference format, creation of posts, groups, consultations, and discussions of clinical cases. It also features user profile storage for certificates and a constantly updated database of medical protocols and guidelines. Additionally, I oversaw the integration of AI based on ChatGPT to enhance functionality and address various user needs.

MEMORIAL SERVICE, [Link](#) [JS, React, Tailwind, Webpack]

Individual Project

Development of a website for a company providing memorial services. The project was delivered "turnkey," including complete frontend and backend development, hosting setup, and deployment according to the client's requirements. The site features an admin panel for managing products, reviews, and photo galleries.

BOOKSHELF, [Link](#) [HTML&CSS, JS, REST API, AXIOS, Parcel]

Team Project / Role: Team Lead & Developer

Developed book purchasing application with Firebase authentication, REST API database integration, shopping cart functionality, and theme switcher.
